

Coffee Machine – Group meeting with previous group – Notes

Jennefier is the con

ohs – occupational health safety

- Npm run serve
- Ohs remove
- Start now
- Your information
- 3 plans :
- Made in the backend
- Basic, comprehensive
- Basic use sap
- Industry specific – companies that already have a manual
- 
- Company name
- Drop a company logo
- NAICS Industry codes, A company can have more than one
- DJG health and safety manual, if you save, you can't, protection layer, can't access it
- 
- Has the front end been done?
- Add more colour for UI
- Front end is react and typescript
- Databases: MySQL – olambic (python way to control)
- 

Payment plan, redirected to stripe

Github repository is shared with us, any documentation, would be helpful, any to do

- Github projects,
- 
- Unit tests,
- There's nothing that she asked the past group
- She wants it to be deployed – that's the thing they feel they 'missed'
- Digital ocean, for creating a droplet
- Backend runs on docker
- 
- OpenAI, It does cost money. Gemini is free, but OpenAI is better

- Datagroup? Is able to view the current database
